Mass Spectrometry for the Novice By John Greaves, John Roboz

With usage of mass spectrometry continually expanding, an increasing number of scientists, technicians, students, and physicians are coming into contact with this valuable technique. Mass spectrometry has many uses, both qualitative and quantitative, from analyzing simple gases to environmental contaminants, pharmaceuticals, and complex biopolymers. The extraordinary versatility can make mass spectrometers daunting to novices. Consequently, new users would benefit greatly from an understanding of the basic concepts as well as the processes that occur in these instruments. **Mass Spectrometry for the Novice** provides exactly that, with detailed, straightforward descriptions and clear illustrations of principles of operations and techniques.

The book begins with an overview that includes essential definitions and then provides information on the components of and the strategies used in the most common instruments. The authors discuss the methodologies available, classes of compounds analyzed, and the types of data that can be generated. A group of representative applications from published articles is summarized, demonstrating the diversity of mass spectrometry. The authors also condense the essentials of the topic into one invaluable chapter that provides a set of concise take-home messages on all aspects of mass spectrometry. The final section provides a collection of resources including books, reviews, and useful websites.

Using simple language, new color figures, clever cartoons, and assuming no prior knowledge, this book provides a readily understandable entrée to mass spectrometry. A CD-ROM with selected figures and cartoons is included.

Editorial Review

About the Author

John Greaves is director of the Mass Spectrometry Facility in the Department of Chemistry, University of California, Irvine. He received his BSc in zoology and genetics from Leeds University in 1975 and a PhD, on the pharmacology of the antimalarial Primaquine, from Liverpool University/Liverpool School of Tropical Medicine in 1979. On moving to the United States, he spent five years at Mount Sinai School of Medicine and seven years at the Virginia Institute of Marine Science, where he was involved with cancer and environmental research, respectively. He moved to the University of California, Irvine in 1992 where he has been particularly interested in the use of open access mass spectrometry to enable scientists lacking experience in the technique facilitate their research by obtaining mass spectrometric data rapidly, on a 24/7 basis. He has more than 80 publications.

John Roboz is a professor in the Department of Medicine (Div. Hematology/Medical Oncology), Icahn School of Medicine at Mount Sinai, New York. He holds a BS degree (1955) from Eotvos University, Budapest, Hungary, and MS (1960) and PhD (1962) degrees in physical chemistry from New York University. In 1969, he joined the Mount Sinai School of Medicine as an associate professor and became a professor in 1980. His research interests have been the development of mass spectrometric techniques for new antineoplastic agents and their application in collaborative studies with basic scientists and clinicians. Dr. Roboz has more than 135 publications. His first book, *Introduction to Mass Spectrometry: Instrumentation and Techniques* (Wiley, 1968) was reprinted in 2000 by the American Society for Mass Spectrometry in the *Classic Works in Mass Spectrometry* series. His second book, in 2002, *Mass Spectrometry in Cancer Research* (CRC Press), won a commendation award from the British Medical Association.

Users Review

From reader reviews:

Charles Stephens:

Reading can called thoughts hangout, why? Because when you are reading a book specially book entitled Mass Spectrometry for the Novice your head will drift away trough every dimension, wandering in each and every aspect that maybe mysterious for but surely will end up your mind friends. Imaging every single word written in a e-book then become one contact form conclusion and explanation this maybe you never get ahead of. The Mass Spectrometry for the Novice giving you a different experience more than blown away your head but also giving you useful facts for your better life in this era. So now let us present to you the relaxing pattern is your body and mind will likely be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

Candice Sharkey:

Do you really one of the book lovers? If yes, do you ever feeling doubt if you are in the book store? Try to pick one book that you just dont know the inside because don't determine book by its protect may doesn't

work here is difficult job because you are scared that the inside maybe not since fantastic as in the outside look likes. Maybe you answer can be Mass Spectrometry for the Novice why because the excellent cover that make you consider concerning the content will not disappoint an individual. The inside or content is definitely fantastic as the outside or even cover. Your reading sixth sense will directly make suggestions to pick up this book.

Norman Fuentes:

Is it you actually who having spare time then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Mass Spectrometry for the Novice can be the answer, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these ebooks have than the others?

Bernice Martinez:

A lot of guide has printed but it differs from the others. You can get it by web on social media. You can choose the most beneficial book for you, science, comedian, novel, or whatever by simply searching from it. It is referred to as of book Mass Spectrometry for the Novice. You can add your knowledge by it. Without making the printed book, it could add your knowledge and make an individual happier to read. It is most critical that, you must aware about publication. It can bring you from one destination to other place.
