### Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) From Brand: CRC Press

Two of the most popular nutraceutical products on the market, omega-3 oil and glucosamine, were originally derived from waste products. Discarded oil from the manufacture of fishmeal became wildly popular as omega-3, a polyunsaturated fat, and the fully hydrolyzed chitosan from shrimp and crab shell, glucosamine, found wide use in joint health. Hundreds of tons of marine by-products are available annually and previous commercial success, together with an overall consumer interest in novel healthy food ingredients, are driving both research and commercialization in the area of marine nutraceuticals.

Edited by pioneers in the field, *Marine Nutraceuticals and Functional Foods* details information on a variety of commercially available and newly developing value-added products. Beginning with an overview of current marine nutraceuticals, the book discusses the origin of omega-3 oils, their beneficial effects on brain health, and their stabilization and delivery into functional foods. It covers the derivation and use of chitin, chitosan, and partially hydrolyzed chitosan as fat- and cholesterol absorbing agents and provides a detailed review of the health benefits and methods for the production of glucosamine. Providing an overview of the ACE-inhibitory and blood pressure reducing properties of marine proteins, it considers the functional constituents of marine algae and seaweed, including its carotenoids, and examines the cancer preventing potential of shark cartilage. The book also analyzes the use of marine microorganisms as a renewable resource and marine sources of calcium. The final chapter describes the discovery and development of a novel immunoenhancing polysaccharide complex derived from the microalgae, *Chlorella*.

An unparalleled single-source reference to the discovery, development, and use of value-added products from marine sources, *Marine Nutraceuticals and Functional Foods* provides the foundation for continuing the dramatic growth in this exciting field.

### **Editorial Review**

About the Author

Ocean Nutrition Canada, Nova Scotia Memorial University of Newfoundland, St. Johns, Ontario, Can

### **Users Review**

**From reader reviews:**

**David Anthony:**

What do you concerning book? It is not important along? Or just adding material when you need something to explain what the one you have problem? How about your free time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Every person has many questions above. They need to answer that question simply because just their can do which. It said that about e-book. Book is familiar on every person. Yes, it is right. Because start from on jardín de infancia until university need that Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) to read.

**Christen Arnold:**

Reading can called mind hangout, why? Because while you are reading a book particularly book entitled Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) your thoughts will drift away trough every dimension, wandering in every single aspect that maybe unknown for but surely will become your mind friends. Imaging just about every word written in a reserve then become one application form conclusion and explanation that will maybe you never get just before. The Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) giving you a different experience more than blown away your mind but also giving you useful info for your better life in this particular era. So now let us explain to you the relaxing pattern at this point is your body and mind will likely be pleased when you are finished reading through it, like winning a game. Do you want to try this extraordinary spending spare time activity?

**Lillian Vaughn:**

Is it an individual who having spare time and then spend it whole day simply by watching television programs or just lying down on the bed? Do you need something new? This Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology) can be the respond to, oh how comes? A book you know. You are thus out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these publications have than the others?

**Yolanda Harris:**

In this era which is the greater particular person or who has ability to do something more are more treasured than other. Do you want to become among it? It is just simple approach to have that. What you are related is just spending your time not very much but quite enough to experience a look at some books. One of several books in the top checklist in your reading list is definitely Marine Nutraceuticals and Functional Foods (Nutraceutical Science and Technology). This book and that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking up and review this e-book you can get many advantages.
