Questions of Perception: Phenomenology of Architecture By Steven Holl, Juhani Pallasmaa, Alberto Perez-Gomez

This new edition of Questions of Perception brings back into print one of the most important architectural theory treatise of recent years. Authored by noted architectural scholars Alberto Pérez-Gómez and Juhani Pallasmaa as well as the preeminent architect Steven Holl, the three separate essays are thematically linked: each one tries to explain the role human perception and phenomenological experience play in architecture. In particular, Holl -- who was named by Time magazine as the most important architect of his generation and the designer of the much-lauded Chapel of St. Ignatius at Seattle University and the highly anticipated Nelson-Atkins Museum of Art addition -- lucidly explicates the importance of intuition in the construction and experience of built space. Holl explains his search for phenomenological experience thus: "To open architecture to questions of perception, we must suspend disbelief, disengage the rational half of the mind, and simply play and explore. Reason and skepticism must yield to a horizon of discovery."
