**Engaging Crystallization in Qualitative Research: An Introduction** By Laura L. Ellingson

**Engaging Crystallization in Qualitative Research**, the first "how to" book to both explain and demonstrate crystallization methodology, offers a framework for blending grounded theory and other social scientific analyses with creative representations of data, such as narratives, poetry, and film. Author Laura L. Ellingson explores relevant epistemological questions that arise when crossing methodological boundaries, provides detailed steps for design and planning, offers guidelines for improving both social scientific and creative/artistic writing, and suggests strategies for targeting publication outlets for multigenre representations.

### Editorial Review

Review

*"[This] book emphasizes effective communication and how to articulate complex information to an audience. Although the book is intended primarily for qualitative researchers, I believe it may be an equally important work for quantitative researchers. In reading this book, I have gained a deeper appreciation for qualitative research in general and a better understanding of how different methods can be applied toward understanding truth."*

(Karl N. Kelley *PsycCRITIQUES* 2009-03-27)

*"The book's key strength is its informed style and uplifting optimism about the future not only of qualitative research but of research at large...the book offers many ideas for researchers to play with and is a thorough and illuminating introduction to the theories, procedures, and politics of qualitative inquiry and publishing."*  
(Jimmie Manning *The Southern Communication Journal* 2010-10-11)

### About the Author

Laura L. Ellingson, Ph.D, is Associate Professor of Communication at Santa Clara University.
