Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering) By Robert Creese, M. Adithan

This practical reference/text provides a thorough overview of cost estimating as applied to various manufacturing industries, with special emphasis on metal manufacturing concerns. It presents examples and study problems illustrating potential applications and the techniques involved in estimating costs.;Containing both US and metric units for easy conversion of world-wide manufacturing data, Estimating and Costing for the Metal Manufacturing Industries: outlines professional societies and publications dealing with cost estimating and cost analysis; details the four basic metalworking processes - machining, casting, forming, and joining; reveals five techniques for capital cost estimating, including the new ACE International's Recommended Practice 16R-90 and the new knowledge and experience method; discusses the effect of scrap rates and operation costs upon unit costs; offers four formula methods for conceptual cost estimating and examines material-design-cost relationships; describes cost indexes, cost capacity factors, multiple-improvement curves, and facility cost estimation techniques; offers a generalized metal cutting economics model for comparison with traditional economic models; and more.;Estimating and Costing for the Metal Manufacturing Industries serves as an on-the-job, single-source reference for cost, manufacturing, and industrial engineers and as a text for upper-level undergraduate, graduate, and postgraduate students in cost estimating, engineering economics, and production operations courses.;A Solutions manual to the end-of-chapter problems is available free of charge to instructors only. Requests for the manual must be made on official school stationery.

Editorial Review

Review

. . .useful to many practitioners as well as to students of manufacturing engineering.

---The Engineering Economist

Users Review

From reader reviews:

John Warner:

The book Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering) can give more knowledge and also the precise product information about everything you want. So just why must we leave a good thing like a book Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering)? Wide variety you have a different opinion about e-book. But one aim this book can give many info for us. It is absolutely right. Right now, try to closer with your book. Knowledge or information that you take for that, you are able to give for each other; it is possible to share all of these. Book Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering) has simple shape nevertheless, you know: it has great and large function for you. You can appearance the enormous world by available and read a reserve. So it is very wonderful.

Arthur Furr:

Reading a reserve can be one of a lot of activity that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a guide will give you a lot of new data. When you read a guide you will get new information since book is one of a number of ways to share the information or maybe their idea. Second, studying a book will make anyone more imaginative. When you studying a book especially fiction book the author will bring you to definitely imagine the story how the characters do it anything. Third, you could share your knowledge to other folks. When you read this Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering), you can tells your family, friends and soon about yours e-book. Your knowledge can inspire the others, make them reading a book.

Wilda Baeza:

The book untitled Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering) is the reserve that recommended to you to learn. You can see the quality of the guide content that will be shown to anyone. The language that creator use to explained their way of doing something is easily to understand. The copy writer was did a lot of analysis when write the book, hence the information that they share to you is absolutely accurate. You also might get the e-book of Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering) from the publisher to make you far more enjoy free time.

Vickie Gilbert:

Reading can be called a head hangout, why? Because when you find yourself reading a book particularly a book entitled *Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering)* your mind will drift away through every dimension, wandering in every single aspect that maybe unidentified for but surely will end up your mind friends. Imaging each and every word written in a guide then become one form conclusion and explanation which maybe you never get before. The *Estimating and Costing for the Metal Manufacturing Industries (Cost Engineering)* giving you another experience more than blown away your thoughts but also giving you useful data for your better life with this era. So now let us show you the relaxing pattern at this point is your body and mind are going to be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary shelling out spare time activity?
