In response, the editors have added an essential special topics chapter detailing the importance of the accreditation process as a fundamental component of the quality assurance and improvement process.

This is an excellent resource as both a textbook and reference guide, to inform and assist graduate and undergraduate students (physical therapy, occupational therapy, speech therapy, social work, psychology, nursing, vocational counseling, therapeutic recreation, hospital administration), as well as practitioners, about the most current information on the etiology, and clinical symptoms of a wide variety of medical and disabling conditions.
