## Scientific Protocols for Forensic Examination of Clothing (Protocols in Forensic Science) By Jane Moira Taupin, Chesterene Cwiklik

When a crime or other incident takes place, clothing items are often present or left behind, and can become directly involved in the case itself. Items of clothing are thus one of the most common types of exhibit examined in court. They can provide valuable information in cases of violent crimes, such as homicide or rape, as well as in burglary, robbery, arson, and vehicular accidents.

### **A unique reference in the forensic arena**

The first of its kind, **Scientific Protocols for Forensic Examination of Clothing** discusses the forensic examination of clothing in criminal cases. It examines the ramifications of DNA profiling and its effect on the screening approach to clothing examination. Coverage includes protocols and procedures, preliminary assessment, examination, testing and sampling, quality assurance and control, and the significance of results.

### ***Applicable to a myriad of readers***

Suitable for a wide range of readers, this book is designed for examiners trying to decide how to approach a clothing examination, those looking for more information on a specific topic, laboratory quality assurance officers in need of a reliable reference, as well as attorneys, investigators, archaeologists, and curators.

### ***Expert authors***

Author Jane Moira Taupin has testified as a forensic expert more than 130 times. Chesterene Cwiklik is a founder of the Pacific Coast Forensic Science Institute. Their expertise makes this a valuable resource for all those who examine clothing items and interpret subsequent findings.

### Editorial Review

#### Review

An interesting feature of this text is the practical exercises at the end of each chapter encouraging the reader to apply the various principles under discussion, and to visit local good and bad examples of green chemistry.

?Lucy Mitton, *Chemistry World*

"The science is supported by excellent illustrations and case studies. Each chapter is well-referenced for further study. ... essential for the proper understanding and preparation of that special case."

?*Law Society Journal*

"The authors are experienced forensic scientists with different perspectives; their experiences combine to provide useful suggestions for the practitioner responsible for the forensic examination of clothing. The forensic scientist assigned to examine clothing for physical evidence would benefit greatly from a full understanding of the suggestions in this book. More importantly, stakeholders (investigator, litigator, and trier of fact) will benefit from clothing examinations conducted in the ways described in this book."

? Richard E. Bisbing, in *American Academy of Forensic Sciences*

" ... provides a very good starting point for readers that have no or limited exposure to the field. I would recommend this book to any forensic examiner understudy ... "

?Ghislain Cormier, National Operations Specialist, RCMP Forensic Investigations Support Services, Ottawa, Ontario

"This is a practical and useful book ... more than meets the hopes of the authors. It should be essential reading for all forensic scientists to remind them tht the forensic process is holistic and not about single evidence types."

?James Robertson, *Australian Journal of Forensic Sciences*

#### About the Author

Forensic scientists and technicians, attorneys, and judges.

### Users Review

#### From reader reviews:

#### James Edwards:

Why don't make it to become your habit? Right now, try to ready your time to do the important work, like looking for your favorite publication and reading a guide. Beside you can solve your trouble; you can add your knowledge by the publication entitled Scientific Protocols for Forensic Examination of Clothing (Protocols in Forensic Science). Try to the actual book Scientific Protocols for Forensic Examination of

Clothing (Protocols in Forensic Science) as your pal. It means that it can be your friend when you experience alone and beside associated with course make you smarter than ever. Yeah, it is very fortunate for you personally. The book makes you considerably more confident because you can know everything by the book. So, we need to make new experience along with knowledge with this book.

**Paul McKinney:**

What do you concern about the book? Is it not important to you? Or just adding material when you really need something to explain your own problem? How about your spare time? Or are you busy? If you don't have spare time to do others' business, it gives you the sense of being bored faster. And you have spare time? What did you do? All people have many questions above. They need to answer that question mainly because just they can do that. It said that about the guide. The book is familiar to every person. Yes, it is right. Because from pre-school until university, we need that Scientific Protocols for Forensic Examination of Clothing (Protocols in Forensic Science) to read.

**Karen Johnson:**

As a college student, I exactly feel bored to be able to read. If their teacher requested them to go to the library or make a summary for some publication, they are complained. Just very little students that have reading's internal or real their interest. They just do what the professor wants, like asked to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring in addition to can't see colorful pics on there. Yeah, it is being complicated. The book is very important in your case. As we know that on this era, many ways to get whatever we wish. Likewise, word says, ways to reach Chinese's country. So, this Scientific Protocols for Forensic Examination of Clothing (Protocols in Forensic Science) can make you experience more interested to read.

**Edward Reed:**

Reading a book makes you to get more knowledge from this. You can take knowledge and information originating from a book. The book is composed or printed or created from each source that will be filled with update of news. Within this modern era like today, many ways to get information are available for an individual. From media social just like newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the Scientific Protocols for Forensic Examination of Clothing (Protocols in Forensic Science) when you essential it?
