Editorial Review

Review

"Every Hubble Space Telescope photo is met with equal measure of awe and wonder." —International Business Times

"Visually stunning...this compendium will blow your earth-based mind." —New York Post

About the Author

DAVID H. DEVORKIN is the co-author of National Geographic's *Hubble: Imaging Space and Time*. He is senior curator of history of astronomy and the space sciences. DeVorkin's major research interests are in the origins and development of modern astrophysics during the 20th century and the origins and development of the space sciences from the V-2 rocket to the present. He is the author/editor/compiler of nine books and more than 100 scholarly and popular articles.

ROBERT W. SMITH is the co-author of National Geographic's *Hubble: Imaging Space and Time*. He is professor of history and director of the science, technology, and society program at the University of Alberta, Canada. His research interests are in the history of the physical sciences, astronomy, cosmology, and spaceflight in the United States. He is currently working on a project, the James Webb Space Telescope (a \$5 billion project that is a joint enterprise of NASA, the European Space Agency, and the Canadian Space Agency, which will launch in 2014).

ROBERT P. KIRSHNER, Clowes Professor of Science in the Harvard-Smithsonian Center for Astrophysics at Harvard University, accomplished groundbreaking work on supernovas and the expansion of the universe using the Hubble Space Telescope.

Users Review

From reader reviews:

David Smith:

The book *The Hubble Cosmos: 25 Years of New Vistas in Space* make one feel enjoy for your spare time. You should use to make your capable much more increase. Book can to become your best friend when you getting pressure or having big problem together with your subject. If you can make reading a book *The Hubble Cosmos: 25 Years of New Vistas in Space* to get your habit, you can get far more advantages, like add your own personal capable, increase your knowledge about a number of or all subjects. You are able to know everything if you like start and read a publication *The Hubble Cosmos: 25 Years of New Vistas in Space*. Kinds of book are a lot of. It means that, science reserve or encyclopedia or other individuals. So , how do you think about this e-book?

Roberta Swinton:

Spent a free the perfect time to be fun activity to perform! A lot of people spent their down time with their family, or all their friends. Usually they doing activity like watching television, going to beach, or picnic
