## Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures By Lounis Adouane

*Improve the Safety, Flexibility, and Reliability of Autonomous Navigation in Complex Environments*

**Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures** explores the use of multi-controller architectures in fully autonomous robot navigation?even in highly dynamic and cluttered environments. Accessible to researchers and graduate students involved in mobile robotics and fully autonomous vehicle navigation, the book presents novel techniques and concepts that address different complex mobile robot tasks.

The author examines the development of reliable elementary controllers and proposes mechanisms to manage the interaction of these multi-controller architectures while addressing different constraints and enhancing metrics/criteria linked to the safety, flexibility, and reliability of the proposed control architectures. He covers the modeling of subtasks, reliable obstacle avoidance, appropriate stable control laws for target reaching/tracking, short- and long-term trajectory/waypoint planning, navigation through sequential waypoints, and the cooperative control and interaction of a group of mobile robots. The author's website provides MATLAB® and Simulink® source code of the main procedures related to the task modeling, planning, and control of mobile robots. It also includes videos showing the main simulations and experiments given in the text.

In addition to flexible and bottom-up construction, multi-controller architectures can be formally analyzed to achieve reliable navigation in complex environments. This book reveals innovative control architectures that can lead to fully autonomous vehicle navigation in these challenging situations.

### **Editorial Review**

About the Author

**Lounis Adouane** is an associate professor at the Institut Pascal - Polytech Clermont-Ferrand in France. He received an MS in 2001 from IRCCyN-ECN Nantes, where he worked on the control of legged mobile robotics. In 2005, he obtained a PhD in automatic control from FEMTO-ST laboratory-UFC Besançon. During his PhD studies, he deeply investigated the field of multi-robot systems, especially those related to bottom-up and hybrid control architectures. Dr. Adouane's current research topics are related to both autonomous navigation of mobile robots in complex environments and cooperative control architectures for multi-robot systems. More specifically, his main research include planning and control, hybrid multi-controller architectures, obstacle avoidance, cooperative robotics, artificial intelligence (such as Markov decision process, multi-agent systems, and fuzzy logic), and multi-robot/agent simulation. He is the author/coauthor of more than 60 refereed international papers on these topics.

### **Users Review**

**From reader reviews:**

**Travis Wysocki:**

The event that you get from Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures will be the more deep you digging the information that hide into the words the more you get thinking about reading it. It doesn't mean that this book is hard to understand but Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures giving you joy feeling of reading. The author conveys their point in specific way that can be understood through anyone who read that because the author of this book is well-known enough. This kind of book also makes your current vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We advise you for having that Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures instantly.

**Amber Weitz:**

Hey guys, do you wants to finds a new book to see? May be the book with the headline Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures suitable to you? Often the book was written by famous writer in this era. Typically the book untitled Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures is one of several books this everyone read now. This particular book was inspired many people in the world. When you read this publication you will enter the new dimension that you ever know before. The author explained their strategy in the simple way, therefore all of people can easily to know the core of this guide. This book will give you a wide range of information about this world now. So you can see the represented of the world within this book.

**Gerald Stewart:**

Don't be worry for anyone who is afraid that this book will certainly filled the space in your house, you will get it in e-book way, more simple and reachable. This particular Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures can give you a lot of friends because by you investigating this one book you have point that they don't and make an individual more like an interesting person. That book can be one of a step for you to get success. This book offer you information that might be your friend doesn't learn, by knowing more than some other make you to be great folks. So , why hesitate? We should have Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures.

**Kathy Graves:**

Reserve is one of source of information. We can add our know-how from it. Not only for students but native or citizen want book to know the up-date information of year to year. As we know those guides have many advantages. Beside many of us add our knowledge, could also bring us to around the world. By the book Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures we can take more advantage. Don't one to be creative people? To be creative person must love to read a book. Only choose the best book that suitable with your aim. Don't become doubt to change your life with this book Autonomous Vehicle Navigation: From Behavioral to Hybrid Multi-Controller Architectures. You can more appealing than now.
