Case-Control Studies (Institute of Mathematical Statistics Monographs) By Ruth H. Keogh, D. R. Cox

The case-control approach is a powerful method for investigating factors that may explain a particular event. It is extensively used in epidemiology to study disease incidence, one of the best-known examples being Bradford Hill and Doll's investigation of the possible connection between cigarette smoking and lung cancer. More recently, case-control studies have been increasingly used in other fields, including sociology and econometrics. With a particular focus on statistical analysis, this book is ideal for applied and theoretical statisticians wanting an up-to-date introduction to the field. It covers the fundamentals of case-control study design and analysis as well as more recent developments, including two-stage studies, case-only studies and methods for case-control sampling in time. The latter have important applications in large prospective cohorts which require case-control sampling designs to make efficient use of resources. More theoretical background is provided in an appendix for those new to the field.

Editorial Review

Review

"This book will rapidly become the bible for researchers using case control studies. It covers essentially all aspects of such designs and their application."

David J. Hand, Imperial College London

About the Author

Ruth H. Keogh is a Lecturer in the Department of Medical Statistics at the London School of Hygiene and Tropical Medicine.

D. R. Cox is one of the world's pre-eminent statisticians. His work on the proportional hazards regression model is one of the most-cited and most influential papers in modern statistics. In 2010 he won the Copley Medal of the Royal Society 'for his seminal contributions to the theory and application of statistics'. He is currently an Honorary Fellow at Nuffield College, Oxford.

Users Review

From reader reviews:

John Richardson:

The knowledge that you get from Case-Control Studies (Institute of Mathematical Statistics Monographs) is a more deep you rooting the information that hide into the words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Case-Control Studies (Institute of Mathematical Statistics Monographs) giving you enjoyment feeling of reading. The article writer conveys their point in particular way that can be understood by anyone who read the item because the author of this guide is well-known enough. That book also makes your own vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We propose you for having this Case-Control Studies (Institute of Mathematical Statistics Monographs) instantly.

Julian Eaton:

You are able to spend your free time you just read this book this guide. This Case-Control Studies (Institute of Mathematical Statistics Monographs) is simple to bring you can read it in the park, in the beach, train as well as soon. If you did not have got much space to bring the particular printed book, you can buy the actual e-book. It is make you quicker to read it. You can save the actual book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Shannon Thompson:

You will get this Case-Control Studies (Institute of Mathematical Statistics Monographs) by look at the bookstore or Mall. Merely viewing or reviewing it might to be your solve challenge if you get difficulties for

ones knowledge. Kinds of this reserve are various. Not only by simply written or printed but additionally can you enjoy this book through e-book. In the modern era including now, you just looking by your local mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still change. Let's try to choose appropriate ways for you.

Robert Holt:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book has been rare? Why so many issue for the book? But any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book and also novel and Case-Control Studies (Institute of Mathematical Statistics Monographs) or others sources were given expertise for you. After you know how the fantastic a book, you feel desire to read more and more. Science reserve was created for teacher or even students especially. Those guides are helping them to increase their knowledge. In some other case, beside science publication, any other book likes Case-Control Studies (Institute of Mathematical Statistics Monographs) to make your spare time a lot more colorful. Many types of book like this.
