Microcontrollers: Architecture, Programming, Interfacing and System Design By Raj Kamal

This fully revised edition of *Microcontrollers: Architecture, Programming, Interfacing and System Design* prepares the students for system development using the 8051 as well as 68HC11, 80x96, ARM and PIC family Microcontrollers and provides a perfect blend of both hardware and software aspects. It clearly explains the use of software building blocks, interrupt handling mechanism, timers, RTOS, IDE and interfacing circuits besides covering aspects such as programming, interfacing and system design.

Editorial Review

Users Review

From reader reviews:

Melanie Moore:

This Microcontrollers: Architecture, Programming, Interfacing and System Design is great book for you because the content which is full of information for you who have always deal with world and also have to make decision every minute. This book reveal it information accurately using great plan word or we can point out no rambling sentences in it. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tricky core information with lovely delivering sentences. Having Microcontrollers: Architecture, Programming, Interfacing and System Design in your hand like obtaining the world in your arm, details in it is not ridiculous one particular. We can say that no reserve that offer you world in ten or fifteen small right but this guide already do that. So , this really is good reading book. Hello Mr. and Mrs. busy do you still doubt which?

William Pak:

As we know that book is vital thing to add our information for everything. By a e-book we can know everything we really wish for. A book is a list of written, printed, illustrated or even blank sheet. Every year has been exactly added. This e-book Microcontrollers: Architecture, Programming, Interfacing and System Design was filled in relation to science. Spend your free time to add your knowledge about your scientific research competence. Some people has different feel when they reading the book. If you know how big good thing about a book, you can truly feel enjoy to read a guide. In the modern era like right now, many ways to get book that you just wanted.

Alan Robert:

Do you like reading a book? Confuse to looking for your preferred book? Or your book had been rare? Why so many question for the book? But virtually any people feel that they enjoy for reading. Some people likes studying, not only science book but in addition novel and Microcontrollers: Architecture, Programming, Interfacing and System Design as well as others sources were given know-how for you. After you know how the truly amazing a book, you feel need to read more and more. Science book was created for teacher as well as students especially. Those guides are helping them to increase their knowledge. In different case, beside science book, any other book likes Microcontrollers: Architecture, Programming, Interfacing and System Design to make your spare time considerably more colorful. Many types of book like this.

April Miller:

As a university student exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading is not important, boring and can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Microcontrollers: Architecture, Programming, Interfacing and System Design can make you sense more interested to read.
