Numerical Techniques in Electromagnetics with MATLAB, Third Edition

By Matthew N.O. Sadiku

Despite the dramatic growth in the availability of powerful computer resources, the EM community lacks a comprehensive text on the computational techniques used to solve EM problems. The first edition of *Numerical Techniques in Electromagnetics* filled that gap and became the reference of choice for thousands of engineers, researchers, and students.

This third edition of the bestselling text reflects the continuing increase in awareness and use of numerical techniques and incorporates advances and refinements made in recent years. Most notable among these are the improvements made to the standard algorithm for the finite-difference time-domain (FDTD) method and treatment of absorbing boundary conditions in FDTD, finite element, and transmission-line-matrix methods. The author also has added a chapter on the method of lines.

Numerical Techniques in Electromagnetics with MATLAB[®], Third Edition continues to teach readers how to pose, numerically analyze, and solve EM problems, to give them the ability to expand their problem-solving skills using a variety of methods, and to prepare them for research in electromagnetism. Now the Third Edition goes even further toward providing a comprehensive resource that addresses all of the most useful computation methods for EM problems and includes MATLAB code instead of FORTRAN.

Numerical Techniques in Electromagnetics with MATLAB, Third Edition By Matthew N.O. Sadiku
Bibliography

- Sales Rank: #1060023 in Books
- Brand: Brand: CRC Press
- Published on: 2009-04-09
- Original language: English
- Number of items: 1
- Dimensions: 1.50" h x 6.10" w x 9.30" l, 2.55 pounds
- Binding: Hardcover
- 648 pages

Editorial Review

About the Author

Prairie View A&M University, Texas, USA

Users Review

From reader reviews:

Sophia Hartman:

What do you think about book? It is just for students because they're still students or it for all people in the world, what best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be compelled someone or something that they don't would like do that. You must know how great along with important the book Numerical Techniques in Electromagnetics with MATLAB, Third Edition. All type of book are you able to see on many solutions. You can look for the internet solutions or other social media.

Lorenzo Davis:

Reading a e-book can be one of a lot of action that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new facts. When you read a reserve you will get new information because book is one of various ways to share the information or their idea. Second, reading a book will make you actually more imaginative. When you examining a book especially hype book the author will bring you to imagine the story how the personas do it anything. Third, you are able to share your knowledge to other folks. When you read this Numerical Techniques in Electromagnetics with MATLAB, Third Edition, you are able to tells your family, friends and also soon about yours guide. Your knowledge can inspire the others, make them reading a reserve.

Angela Souther:

The book untitled Numerical Techniques in Electromagnetics with MATLAB, Third Edition is the guide that recommended to you to see. You can see the quality of the e-book content that will be shown to an individual. The language that article author use to explained their way of doing something is easily to understand. The article writer was did a lot of study when write the book, therefore the information that they share to you personally is absolutely accurate. You also can get the e-book of Numerical Techniques in Electromagnetics with MATLAB, Third Edition from the publisher to make you a lot more enjoy free time.

Harold Esparza:

As a scholar exactly feel bored to help reading. If their teacher questioned them to go to the library in order

to make summary for some publication, they are complained. Just minor students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Numerical Techniques in Electromagnetics with MATLAB, Third Edition can make you really feel more interested to read.
