Editorial Review

Review

Interest in interactional feedback and its role in second language (L2) acquisition have a long history, motivated in part by teachers' concerns about whether and how to correct L2 learners and in part by theoretical issues in the field of second language acquisition. Thus a book that brings together the different pedagogical and theoretical perspectives and the research they have given rise to is most welcome. Hossein Nassaji is to be congratulated in producing an informed, comprehensive and very readable account of this body of work. His book is notable for both its breadth of coverage and the clarity with which complex issues relating to interactional feedback are discussed. This is a book that I will be referring to frequently in my own research and in my graduate-level teaching.

Nassaji has reviewed and analyzed hundreds of publications exploring the role of interactional feedback in second language learning. The book covers a range of theoretical perspectives and draws on research with young learners and adults, in classrooms and laboratory settings. Nassaji shows how the research findings can guide teachers in answering important pedagogical questions about how to respond to the errors their students make.

Hossein Nassaji's book provides an excellent and detailed review of interactionist theory and research (descriptive, experimental and comparative) related to the role of feedback in classroom-based language learning. Particularly useful is that Nassaji links theory and empirical findings to pedagogical implications, providing suggestions for enhancing the effectiveness of feedback for second language learning. Each chapter usefully begins with a set of goals for that chapter and ends with a set of discussion questions.
