Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain Injury From Brand: CRC Press

Providing the information required to understand, advocate for, and supply post-acute vision rehabilitative care following brain injury, **Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain Injury** bridges the gap between theory and practice. It presents clinical information and scientific literature supporting the diagnostic and therapeutic strategies applied in a comprehensive overview of current diagnostic and treatment strategies in adult post-brain injury vision rehabilitation.

Includes a foreword by Dr. Sue Barry

Because post-brain injury rehabilitation works best in a team setting where the entire person can be treated, this text has been carefully designed as a multidisciplinary resource with an emphasis on models for working with the rehabilitation team. The book covers a myriad of topics such as post-brain injury vision rehabilitation; eye movements; binocular dysfunction; visual field loss; visual-spatial neglect; shifts in visual egocenter affecting balance and coordination; visual-vestibular interactions; central vs. peripheral visual attention; as well as deficits in object perception, visual memory, and visual cognition.

The book details models that vision specialists working with the rehabilitation team can use to achieve the best success for the patient in rehabilitation; vision rehabilitation concepts and the science from which they have been developed; examples of therapeutic exercises; practice management information for the post-brain injury vision rehabilitation practice; and information on the legal process in which one frequently becomes involved in this type of work. Edited by eminent clinicians, the book highlights the work of contributors who are well-respected academicians and researchers, bringing together the clinical information that enables everyone involved in a brain injury case to grasp the diagnostic and therapeutic strategies.

Delores Villarreal:

Do you one among people who can't read pleasant if the sentence chained within the straightway, hold on guys that aren't like that. This Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain Injury book is readable by you who hate the perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving actually decrease the knowledge that want to supply to you. The writer associated with Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain

Injury content conveys thinking easily to understand by many people. The printed and e-book are not different in the content material but it just different such as it. So , do you even now thinking Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain Injury is not loveable to be your top collection reading book?

Judith Ellis:

As a scholar exactly feel bored to be able to reading. If their teacher expected them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's heart or real their interest. They just do what the teacher want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Vision Rehabilitation: Multidisciplinary Care of the Patient Following Brain Injury can make you experience more interested to read.
