## **Editorial Review**

### Review

“This can be found in the autobiographies of many reformed characters from the field. The perspectives in this collection do, however, provide progressive insights into a pragmatic way forward for those battling away in their professional lives against the harm involved in alcohol-related violence.” (*The Howard Journal of Criminal Justice*, 5 June 2014)

“This is a useful and instructive book, with all the information laid out in an accessible way. Its practical and versatile nature means it will ‘hit the spot’ for a diverse range of readers – policymakers, health and social-care commissioners, researchers and students of alcohol studies, and practitioners in this field, especially those working with offenders in prison and elsewhere within the criminal justice system.” (*DrugLink*, 1 July 2013)

“The book’s key strength is in the breadth of approaches presented, and it represents a strong step towards a more integrated approach to studying and reducing alcohol-related violence.” (*Addiction*, 4 June 2013)

### Review

The strong association between alcohol consumption and violence is undeniable but complex and a large scientific literature has attempted to clarify the relationship between them. This comprehensive text goes farther than any I have seen in illuminating the nature of the link and exploring implications for the treatment and prevention of alcohol-related violence. It is essential reading both for those interested in reducing a major component of alcohol-related harm and those interested in reducing interpersonal violence. —**Nick Heather, Professor Emeritus, Northumbria University**

In addition to being an excellent research in her own right, Mary McMurrin is a skilled editor who has worked tirelessly to promote evidence-based practice in corrections and forensic mental health. She knows how to identify hot topics, recruit top-notch authors, and ensure chapter contributions are both scientifically sound and practically useful. This volume is a perfect example. Whether you work on the front lines, as an administrator, or as a researcher or policy analyst, brace yourself: Reading this book will make you rethink how you deliver services to violent offenders with alcohol use problems. —**Professor Stephen D Hart, Simon Fraser University**
