Co-design Approaches to Dependable Networked Control Systems (ISTE)

By Daniel Simon, Ye-Qiong Song, Christophe Aubrun

This book describes co-design approaches, and establishes the links between the QoC (Quality of Control) and QoS (Quality of Service) of the network and computing resources. The methods and tools described in this book take into account, at design level, various parameters and properties that must be satisfied by systems controlled through a network. Among the important network properties examined are the QoC, the dependability of the system, and the feasibility of the real-time scheduling of tasks and messages. Correct exploitation of these approaches allows for efficient design, diagnosis, and implementation of the NCS. This book will be of great interest to researchers and advanced students in automatic control, real-time computing, and networking domains, and to engineers tasked with development of NCS, as well as those working in related network design and engineering fields.

The authors on this planet always try to improve their expertise in writing, they also doing some analysis before they write to the book. One of them is this Co-design Approaches to Dependable Networked Control Systems (ISTE).

Manuel Pina:

Reading can called brain hangout, why? Because if you find yourself reading a book specifically book entitled Co-design Approaches to Dependable Networked Control Systems (ISTE) your brain will drift away trough every dimension, wandering in most aspect that maybe not known for but surely can be your mind friends. Imaging just about every word written in a reserve then become one type conclusion and explanation which maybe you never get before. The Co-design Approaches to Dependable Networked Control Systems (ISTE) giving you a different experience more than blown away the mind but also giving you useful info for your better life within this era. So now let us demonstrate the relaxing pattern the following is your body and mind is going to be pleased when you are finished reading through it, like winning a sport.
